Hi Nancy,

Attached is a preliminary draft of the summary of Tom Myers' comments for your review. It is longer and more detailed than you may have anticipated, so I would like to know if this format and detail is acceptable before I finish the summary of other comments. I converted the comment pdf document to a WORD document, and then condensed and organized the comments as presented in the attachment. Some of the comments are somewhat repetitive, but the major points made in the comments are related to alleged monitoring and modeling deficiencies.

If you want the summary of comments presented in a more condensed, less detailed description or other format, please let me know as soon as you can. Otherwise I will continue and plan to provide the final draft summary as presented in the attached preliminary version by the end of this week.

Thanks,

Jim
